

A New Form Of Tradition.

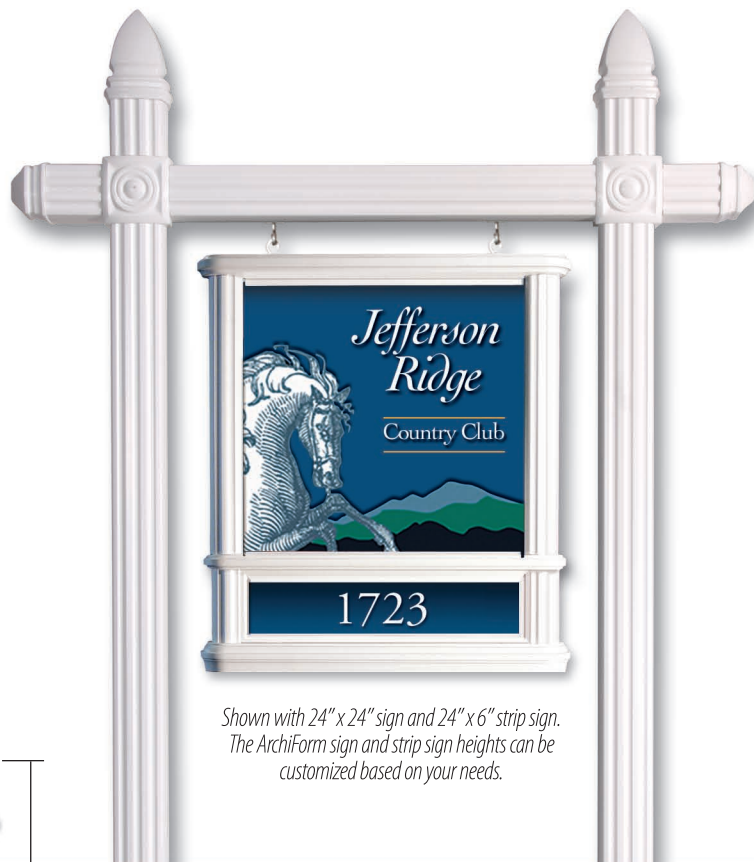

Beauty should be more than skin deep! Our signs look fantastic and are built to stay that way year after year! The ArchiForm Sign System was designed with sophisticated computer engineering software to insure precision fit and finish. The tough injection-molded outer shell is made even more resilient by our custom blended WeatherForm™ polymer, especially formulated to protect ArchiForm from harmful UV rays and excessive dust accumulation. A solid molded

urethane core adds superior strength and durability. **Utility.** With ArchiForm, changing sign boards is a snap, because the decorative top section is removable! Our "fluted column" style posts are both elegant and durable. Also, our modular design lets you add multiple strip signs to our hanging version. We have the sign you need to best suit your space and size requirements! For complete specifications and configuration possibilities, contact your authorized EXPOGO dealer today!

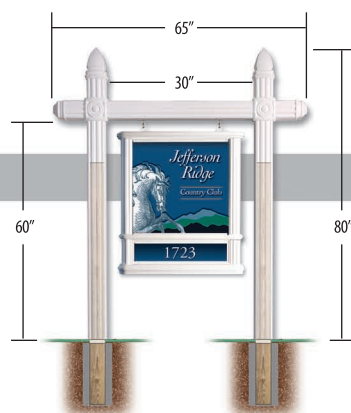

AFG-1824

Mounting posts are designed to accept 4" x 4" pressure treated boards set into concrete. Extend 40" up into the posts for ideal stability.

ArchiForm's modular design allows for easy assembly. Expand your hanging sign by adding components and additional strip signs.

ArchiForm® Pedestal. Classic Looks. Built To Last.

ArchiForm is cost effective and delivers a premium quality look that "fence post" PVC just can't duplicate. Our elegantly styled component system was designed with sophisticated CAD technology to produce parts that fit together with strength and precision. And the best part is that it only takes minutes, not hours, to assemble and install. ArchiForm signs are designed with incredible detail and architectural flair that will make your location stand out from the crowd. Typical ArchiForm applications include: real estate developments, retail stores, professional offices, restaurants, bed and breakfast homes, historical sites, and more!

Solid urethane core adds strength and durability and gives ArchiForm a solid "wooden" feel.

The ArchiForm slotted columns are distinctive and offer great versatility. Our 24" x 18" x 5" Ultra Plus™ signboard is high quality extruded polystyrene foam between two layers of 2mm expanded PVC Liner.

AFP-1824
ArchiForm Pedestal Sign
Suggested Retail **\$495** Includes: 24" x 18" UltraBoard Plus sign blank
Dimensions: 36" w x 59" tall
Weight: 28 lbs. Ship/Dim Wt. 33 lbs.
(1) 4" Pressure Treated 2" x 6" Plank, Plank Not Included.

Optional heavy duty stands are available for both indoor placement and for a more permanent use outdoors.
